

Developing Markets for
Third Sector Providers:

Social Value in Commissioning

A free one-day training event for public sector
commissioning and procurement staff

How can we better **understand** what communities' **value** and what makes a **difference** to them?

How can we allocate **resources** to the best **combination** of projects and services?

If **£1** is spent on buying goods or services, can that same **£1** also be used to produce a wider **benefit** to the community without adding **cost**?

With increasing pressure on budgets, public authorities must reform services and purchase with greater efficiency and sustainability. Positive outcomes must be maximised whilst avoiding unintended consequences.

Find out more about how to secure social value and how doing so can contribute to national and local outcomes, the recommendations of the Christie Commission, and Best Value requirements.

The benefits for you:

- Learn how to make judgements about value
- Improve your definition and measurement of outcomes
- Maximise social value throughout the commissioning cycle

Upcoming full-day events:

11 July 2012: Glasgow (fully booked)
25 October 2012: Glasgow (places available)

Cost:

This training event is delivered as part of the Scottish Government's Developing markets for the Third Sector Providers programme. Places are currently available free-of-charge to Scotland's public sector.

Further information:
